

Amendments to the Specification

Please replace paragraph [0028] with the following amended paragraph:

[0028] In one embodiment, display image brightness ~~registers~~ ~~indicators~~ 550 include data indicating image brightness determined by monitoring and accumulating pixel color within the display image. The display image brightness ~~registers~~ ~~550 indicators~~ can then indicate to control logic 555 the brightness of certain features within the display image, such as display image character and background brightness. Control logic 555 can be implemented as hardware, software or a combination of hardware and software.
